DENTOFORM

Columbia

DENTALEZ

2021 CATALOG

Columbia Dentoform® works with the world's top educators to develop teaching solutions that simulate conditions our future dental professionals will encounter in everyday practice.

Our typodonts and teeth can be customized to provide unique solutions for all types of teaching institutions including the specialty areas of orthodontic, endodontic, implant, periodontic, pediatric and even veterinary dentistry.

Columbia manikins make student practice as realistic as possible and include adult, pediatric, and anesthesia "patients" that simulate the actual human head and mouth size.

We at Columbia Dentoform look forward to partnering with you to provide the teaching aids to fit your program.

For additional information about Columbia Dentoform Teaching and Equipment, please visit www.columbiadentoform.com.

RETURN POLICY

1. If product is being returned for credit a Return Merchandise Authorization number is required. Please be sure to include the Return Merchandise Authorization number on the package you are returning. Products returned for credit without a Return Authorization Number cannot be accepted and will be returned to the customer. There will be a 15% handling charge ($25 minimum) for items returned for restocking. Product returns more than 60 days cannot be returned for credit. The authorization expires if the products listed are not received within 30 days from date authorization is approved. The amount of credit authorized will be at the sole discretion of DENTALEZ. Please visit www.columbiadentoform.com to request RMA number.

2. Custom ordered products cannot be returned for credit.

860 SERIES ADULT DENTOFORM TYPODONTS

860 Series adult typodonts provide students with a great level of detail, including a 30-degree condyle and an inclined Curve of Spee. These models *(Typodonts)* and replacement teeth can be utilized for teaching restorative, fixed prosthodontics, orthodontic, endodontic, partially edentulous, anatomy and occlusion courses. They can be adapted to fit any bench manikin system and individual teeth are easily replaced for study or additional practice.

M-860 Articulated Dentoform

With inclined Curve of Spee;
32 removable teeth,
hard gums and
spring-joint articulator.

Part No:
1M860

MS-860 Articulated Dentoform

With 28 removable teeth,
hard gums and
spring-joint articulator.

Part No:
1MS860

SM-PVR-860 CSB Articulated Practice Model

With 32 removable teeth,
soft gums and sping-joint
articulator, and upper bushings.

Part No:
1MSMPVR860 CSB

M-PVR 860 MQD Articulated Dentoform

With 32 removable teeth,
soft gums and sping-joint
articulator. Adapted to work
with Magnetic Quick Disconnect
Manikin System (MQDMS).

Part No:
1MPVR860MQD

M-PVR-860 EDENT 5, 20E8, 3 Partially Edentuolus Articulated Dentoform

With edentulous #5 and #20,
and Endo #3, #8 and #28
removable teeth, soft gums
and spring-joint articulator.

Part No:
1MPVR860ED5, 20E8, 3

REGISTERED DENTAL ASSISTANT PREPARATION TEETH, BLUE

For use by dental assisting students to practice filling preparations. These teeth are available individually, or as a set of four to include #3MO, #14MOD, #19DO and #30MOD. #8 PFM available individually only.

Part Number	
1860P1X4 CADA	Set of Four includes #3, 14, 19 and 30
1860P03MO(BL) CADA	EP-TPR-860 #03/MO CADA - Mesial, Occlusal

ENDO-860 Root Canal Tooth

Clear natural root, with red pulp. Available in centrals, bicuspids and molars.

Part No: 1860E03PL

IV-EP-ENDO #8 Root Canal Tooth

Endodontic treatment tooth for students to drill access opening, ream the canal, and fill.

Part No: 1860E08

IV-EP-ENDO #3 Access Opening Only

Endodontic tooth for students to drill and locate access opening only.

Part No: 1860E03

NOTES:
For pre-prepped teeth or inlays, crown, amalgams, please contact our customer service representative who can assist you in your selection from a wide variety of options.

1560 SERIES ADULT DENTOFORM TYPODONTS

The M-1560 and M-PVR-1560 Dentoform typodonts allow for accurate interchangeability and stability, in addition to superior anatomy and occlusion. These typodonts can be utilized for teaching restorative, fixed prosthodontics, orthodontic, endodontic, partially edentulous, anatomy and occlusion courses. Dentoform typodonts can be adapted to fit any of our bench and chair manikins.

M-1560 Hard Gum Dentoform

Typodont with 32 removable indexed teeth, hard pink gums a spring-joint articulator.

Part No:
1M1560

M-PVR-1560-EDENT4,10

Articulated Dentoform with edentulous spaces at #4 and #10; 30 removable indexed teeth, soft gingiva facings and a spring-joint articulator.

Part No:
1MPVR1560EDENT4,10

M-PVR-1560

Articulated Dentoform with 32 removable, indexed teeth, soft gums and spring-joint articulator.

Part No:
1MPVR1560

DENTAL HYGIENE DENTOFORM TYPODONTS

Articulated Dentoform comes standard with 32 removable numbered anatomical root teeth. Available with either clear or reddish translucent gums for instruction on subgingival instrumentation placement, adaption and alignment to the long axis of the tooth, providing excellent visual contrast with silver instrument blade adaptation for supra and subgingival scaling. Adjustable articulator keeps the typodont open for both instrumentation on manikin mount, or patient oral health instruction. Ideal for the demonstration of scaling and cleaning methods to patients or students. Accurate furcation anatomy.

Articulated Dentoform

Pink gingiva with press-in removable rooted teeth (shown to the right).

Part No: 1MYNR1560

Pink gingive with screw-in rooted teeth (not shown).
Part No: 1MSYNR1560

SPECIALTY TEETH

We at Columbia work with our institutional partners to provide a variety of teeth to fit the model. A single model can be modified throughout the year to adapt to the teaching needs or each course, enabling your school to have one main typodont model for the first year, and then design teeth to place in the model to simulate various cases using the same model. There's no limit to the number and type of restoratives a single model can be used to teach.

Root Plugs

A root plug can replace a standard tooth, creating an edentulous space for students to learn to fabricate multi-unit bridges, using their original model. Students can also use these root plugs as as base to place implants.

Fractured Teeth

Using the instructor's design, Columbia can duplicate a fractured tooth used to teach the use of composites to restore a fractured tooth. Just replace a healthy tooth with the fractured tooth, keeping the same original model.

Part No.1860P10FRAC

TDC Caries Teeth

To practice removing hard caries, and restoring the tooth to its final anatomy, Columbia makes teeth with caries just under the surface for practice removing the caries and restoring the tooth to its natural shape.

Part No. 1860C08M+D
Central Incisor

Part No. 1860C30M+O+D
Molar

Pre-Prepped Teeth

Columbia can provide a variety of pre-prepped teeth, or create a custom design, to enable students to practice restoring teeth to their natural shape.

PERIODONTAL ADULT DENTOFORM TYPODONTS

KM-110-C and KM-C-110 Articulated Periodontal Dentoform

With calculus on anatomically rooted teeth, osseous and gingival defects simulate chronic generalized periodontitis. Teeth adhere with a simulated periodontal ligament (PDL) which simulates the feel and resistance of tooth extraction. This typodont features soft gums that are removable and replaceable. Also available with clear gums to view bone degeneration.

KM-110-C Peridontal Typodont

With pink gums and calculus.

Part No:
1MKM110C

KM-C-110-C Peridontal Typodont

With clear gums and calculus.

Part No:
1MKMC110C

KM-210-C Articulated Periodontal Dentoform

With calculus on anatomically-rooted teeth, osseous and gingival defects, demonstrating case patterns Types I, II, III and IV (as listed in “Current Procedural Terminology for Periodontists” Third Edition). Gums are removable and replaceable.

KM-210-C Periodontal typodont with pink gums, calculus and inflamation (shown right).
Part No: 1MKM210C

KM-210-C Periodontal typodont with pink gums, calculus and inflamation (not shown).
Part No: 1MKMC210C

1MKME310 MU Extraction and Suturing Model

Features a periodontally compromised typodont with 31 natural rooted teeth and #30 edentulous space, used to teach extraction and suturing. The teeth are adhered with a material to simulate the resistance of teeth to be extracted. The student may then practice proper placement of surgical sutures after extraction, implant placement or root tip removal.

This model cannot be refurbished for additional use once all 32 teeth have been extracted. These typodonts are made to orders. Contact a Columbia representative for delivery timeline.
Part No: KM-E-310

Sutured extraction

PROSTHODONTIC

Edentulous articulated typodont with soft pink gums. Ideal for taking impressions and fabricating a full denture. Articulated jaws with soft gums and adjustable leveling pin.
Also available in a hard gum model.
Part No: 1MEDENT-COL

PARTIAL DENTOFORM MODELS

Partially edentulous models offering a variety of edentulous combinations for practicing impression taking, frame design and partial denture fabrication.

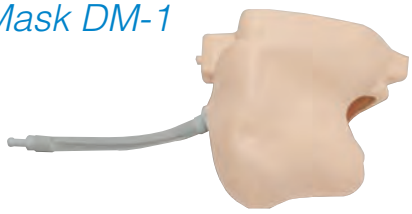
With ears AH-1-AE.

Part No:
1KAH1AE

Drainage Mask DM-1

Part No:
1KDM1



AMQD Spring-Joint

Part No:
1KAMQD

MQD Typodonts (sold separately)

Upper and lower jaws with removable teeth and soft gingival facings adapted for Magnetic Quick Disconnect System Manikin. (Not articulated).

Part Number	
1MJPVR8612MQD	Adult 860, 32 removable teeth
1MJPVR15612MQD	Adult 1560, 32 removable teeth
1MJPVNR7612MQD	Pediatric 760, 24 removable teeth
1MJPVR27612MQD	Mixed Dentition, 24 removable teeth

Magnetic Quick Disconnect System Manikin (MQDMS)

Magnets in the manikin and typodonts (sold separately) make for a quick change of typodont from student to student. System includes aluminum cranium with anatomical ears, AMQD spring joint articulator, and DM-1 drainage mask. (Dentoform Typodont sold separately. Any typodont can be made an MQD to work with the MQDS).

Complete Magnetic Quick Disconnect System (typodont not included).
Part No: 1KMQDMS

Part No: 1K0ATMB13

Includes light OR sound sensors
Part No: 1K0ATM13

MOUNTS available on page 23.

ADULT AUXILIARY

M-1R-DA-8 Adult Chair Manikin for Auxiliary Dental Training, Complete

Includes Chair Mount, Dentoform, Adult Cranium and Fletcher Face.

Complete Adult Auxiliary Chair Manikin
Part No:
1KM1RDA8

M-1R-3 Chair Mount

Mounts onto chair. Default mount for M-1R-DA-8 Adult Chair Manikin.

Part No:
1KM1R3

M-PVR-860 Dentoform (default model)

Part No:
1MPVR860

XPH-2 Fletcher Plassein Face

Part No:
1KFLETCHER rubber (shown)

1KXPH-2 latex

AH-1-BP Cranium

Part No:
1KAH1BP

ADULT AUXILIARY X-RAY

M-1974 X-Ray Manikin, Complete

Manikin for practice of dental radiology. Includes Radiographic Typodont, Adult Cranium, Fletcher Face and placing radiographic and mount.

Includes M-1R-7 Chair Mount (1KM1R7) and Flexible Finger (1KFF1)

Part No: 1KM1974

Optional Mounts

M-1R-3 Chair Mount (1KM1R3)
Part No: 1KM19741R3

M-1R-10 SB Head Rest Mount (1KM1R10SB
Part No: 1KM197410SB

XPH-2 Fletcher Plassein Face

Part No:
1KFLETCHER rubber (shown)

1KXPH-2 latex

M-1R-3 Chair Mount

Mounts onto chair. Default mount for M-1R-DA-7 Pediatric Chair Manikin.

Part No:
1KM1R3

1974-RAD Adult X-Ray Articulated Dentoform*

With tongue mounted on Magnetic Quick Disconnect System trays, for use with 1KM2974 Adult X-Ray Manikin

Part No:
1M1974RAD

M-1R-10 SB Chair Mount with Small Ball Joint

Part No:
1KM1R10SB

AH-1-BP Cranium

Part No:
1KAH1BP

M-1R-7 Chair Mount

Part No:
1KM1R7

NOTES:
For an Adult manikin usable for both regular auxiliary AND X-ray Dentoform typodonts, order 1KM1974. *See accessories, page 17 for O-Rings and Sliding Clamp Replacements.

PEDIATRIC AUXILIARY

M-1R-DA-7 Pediatric Chair Manikin for Auxiliary Dental Training, Complete

Includes Chair Mount, M-PVNR-760 Pediatric Dentoform Typodont, Pediatric Cranium and Pediatric Plassien Face.

Complete Pediatric Auxiliary Chair Mounted Manikin–includes M-1R-3 Chair Mount, M-PVNR-760 Dentoform, AH-7-BP Pediatric Cranium and 1KMIKEY Pediatric Plassein Face.

Part No: 1KM1RDA7

M-1R-3 Chair Mount

Mounts onto chair. Default mount for M-1R-DA-7 Pediatric Chair Manikin.

Part No:
1KM1R3

AH-7-BP Pediatric Cranium

Part No:
1KAH7BP

M-PVNR-760 Pediatric Dentoform

With soft gums and 24 removable numbered Ivorine teeth.

Part No:
1MPVNR760

Pediatric Plassein Face

Part No:
1KMIKEY

PEDIATRIC X-RAY

M-765 Pediatric X-Ray Manikin, Complete

Includes Chair Mount, pediatric x-ray Dentoform, pediatric Cranium and pediartric Plassein Face.

Complete pediatric X-ray manikin

Part No: 1KM765

M-1R-3 Chair Mount

Mounts onto chair. Default mount for M-1R-DA-7 Pediatric Chair Manikin.

Part No:
1KM1R3

AH-7-BP Pediatric Cranium

Part No:
1KAH7BP

M-765 RAD Pediatric X-Ray Dentoform

Part No:
1M765RAD

Pediatric Plassein Face
